

SRG1

THE POWER OF SOLIDS

SPECIFICATIONS

Smart Release Technology SRG1 systems are available as pre-fabricated skids or can be purchased individually, all of which are easily movable.

- Small footprint of the skid allows you to replace existing liquid systems and reduce overall footprint in a mechanical room.
- SRG1 systems are fully customizable, so you can have the system that's perfect for your application.
- SRG1 systems are available with a pre-mounted conductivity controller to enhance the ease of installation.

CUSTOMER VALUE

With Dober's proven solid cooling water chemistry and membrane coating technology, you will experience all the benefits of a well-run program that delivers expected results and customer peace of mind, with safety, asset protection, sustainability and smarter technology at the forefront.

1 SIMPLE, SAFER, RELIABLE

Smart Release Generation 1 offers a simpler, safer, and reliable cooling tower water treatment program at your fingertips.

Utilizing proven Smart Release coated tablets and our innovative controlled biocide dosing method, you can have equivalent or superior performance and reliability compared to liquid-based treatments.

2 MAKE YOUR JOB EASIER

With Smart Release Generation 1, efficiency, environmental consciousness, and cost-effectiveness converge to offer you an unparalleled cooling water treatment solution.

- No chemical spills or leaks
- Hassle-free maintenance
- Eliminate the need for chemical metering pumps

3 STREAMLINE YOUR PROCESS

With SRG1, you can:

- Enhance sustainability by reducing shipment weights over 4x
- Improve safety
- Take up a smaller operational footprint
- Easy serviceability and no drum disposal costs means you can streamline your process while reducing operational expenses
