

# Soltellus™

## For Corn Crop Performance

Nutrients in your fertility program get tied up in the soil or lost to the environment before your crops can even use them. Soltellus™ keeps them available. Just add Soltellus™ to the passes you're already making.

### Proven Performance

#### SOLETELLUS™ YIELD ADVANTAGE BY APPLICATION TYPE

📍 Various Locations | 48 Total Trials

#### SOLETELLUS™ N-P-K UPTAKE

📍 Iowa | 18 days after V10 Y-Drop

### Instructions

#### Application Methods:

In-Furrow or 2x2 with Starter Fertilizer, Foliar, Sidedress, Y-drop, or Irrigation

#### Application Rate:

- 2 qt/A in a single application **or**
- 1 qt/A split (planting and in-season)

#### Tank Mixing:

Add Soltellus™ first to improve overall mix performance.

### Optimal Timing

- Planting to Emergence (In-Furrow or 2x2 with Starter), or Soil Broadcast
- V3-V6, (Sidedress, Y-drop, or Foliar)

## Performance Guarantee

We know Soltellus delivers and we back that promise to our growers. Purchase and apply 270 gallons (540 acres) and achieve a return on investment equal or greater than 2x the costs or we refund your money.

*Guarantee applies to growers who follow recommended application guidelines and program requirements. Terms and conditions apply.*
