

Soltellus™

For Soybean Performance

Nutrients in your fertility program get tied up in the soil or lost to the environment before your crops can even use them. Soltellus™ keeps them available. Just add Soltellus™ to the passes you're already making.

📍 Various Locations | Partner & Research Trials

Instructions

Application Methods:

In-Furrow with Starter Fertilizer, Pre-Emergence Foliar Spray (with herbicide fungicide) or Irrigation

Application Rate:

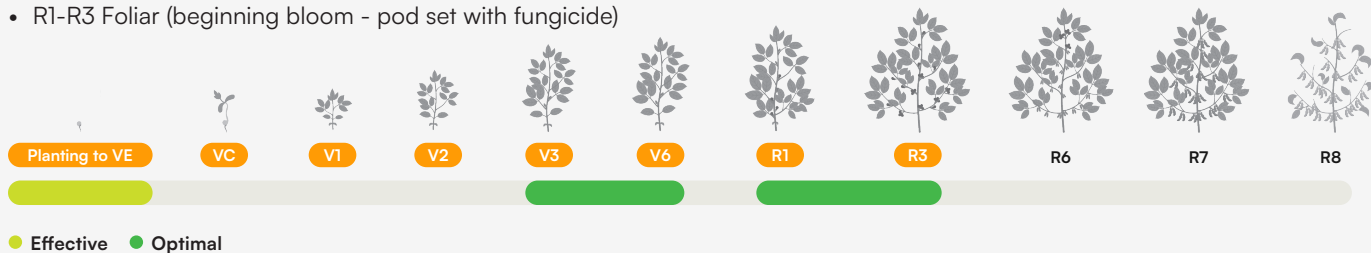

- 2 qt/A in a single application **or**
- 1 qt/A split (V3-V6 and R1-R3)

Tank Mixing:

Add Soltellus™ first to improve overall mix performance.

Optimal Timing

- V3-V6 Foliar (tank mix with herbicide)
- R1-R3 Foliar (beginning bloom - pod set with fungicide)

Performance Guarantee

We know Soltellus delivers and we back that promise to our growers. Purchase and apply 270 gallons (540 acres) and achieve a return on investment equal or greater than 2x the costs or we refund your money.

Guarantee applies to growers who follow recommended application guidelines and program requirements. Terms and conditions apply.
